Listing of the Claims

1-47. (Cancelled)

48. A retroreflective sheeting, comprising:

- (a) a first layer comprising a first polymeric material having an elastic modulus less than  $7 \times 10^8$  pascals, the first layer having a first and second major surface and allowing light that enters the first layer through either the first or the second major surface to pass through the first layer to exit the first layer through the other major surface; and
- (b) a second layer comprising a second polymeric material having an elastic modulus greater than  $20 \times 10^8$  pascals, the second layer having a third major surface and having a surface opposite the third major surface in which cube corner elements are formed;

wherein the third major surface of the second layer attaches directly or through only a thin coating to the second major surface of the first layer;

wherein the second layer attaches to the first layer through the thin coating, the thin coating promoting adhesion between the first and second layers; and

wherein the thin coating is a primer.
